

R550 Multi-output Anesthesia Machine

Regular assembly(R550-A), vaporizer(R580), Inlet/Outlet End Caps(R580-IC) and tube accessory kit are included in the R550 anesthesia machine. Different air supply, induction chambers, small animal mask, filter canisters and gas evacuation apparatuses can be selected to form the experimental platform for anesthesia recovery of different animals.

With the latest design, it can be applied to simultaneous anesthesia of multiple mice, rats, cats, rabbits and other animals (1-5 small animals), and every channel can be controlled independently.

Order Information:

Cat No.	Product Description	Configuration	Remarks
R550IE	5ch Small Animal Anesthesia Machine-Isflurane, Easy Fill	●	
R550IP	5ch Small Animal Anesthesia Device-Isflurane, Pour Fill	●	Contains connection tubing for mask & induction chamber
R550SE	5ch Small Animal Anesthesia Machine-Sevoflurane, Easy Fill	●	
R550SP	5ch Small Animal Anesthesia Machine-Sevoflurane, Pour Fill	●	
R510-S	Portable Stand for R510 Series Anesthesia Machine	○	Upgrade to portable type
R800-N2O-4E	Expansion Assembly with 0.1-4LPM N ₂ O Flowmeter	○	

Note: ● Recommended configuration ○ Optional
