

68014 Neonatal Mouse Adaptor
(with 20° ear bars 68315 and 45° ear bars 68316)

This adaptor is specifically for neonatal mice. It has extended base plate (150mm(L) x 100mm(W)) and provides more operating space for researchers. It can be easily placed on the RWD stereotaxic instruments. The incisor, nose clip and ear bars can be adjusted up and down in 20mm range to ensure the skull level.
